Digital Education Quality Label provides framework to enhance lecturers' competence in digital education

Liia Lauri, PhD
Head of Higher Education
Estonian Quality Agency for Education

Sille Paas, MSc
Instructional Designer
Tallinn University of Technology

Quality Label affirms good quality in digitally enhanced teaching and learning

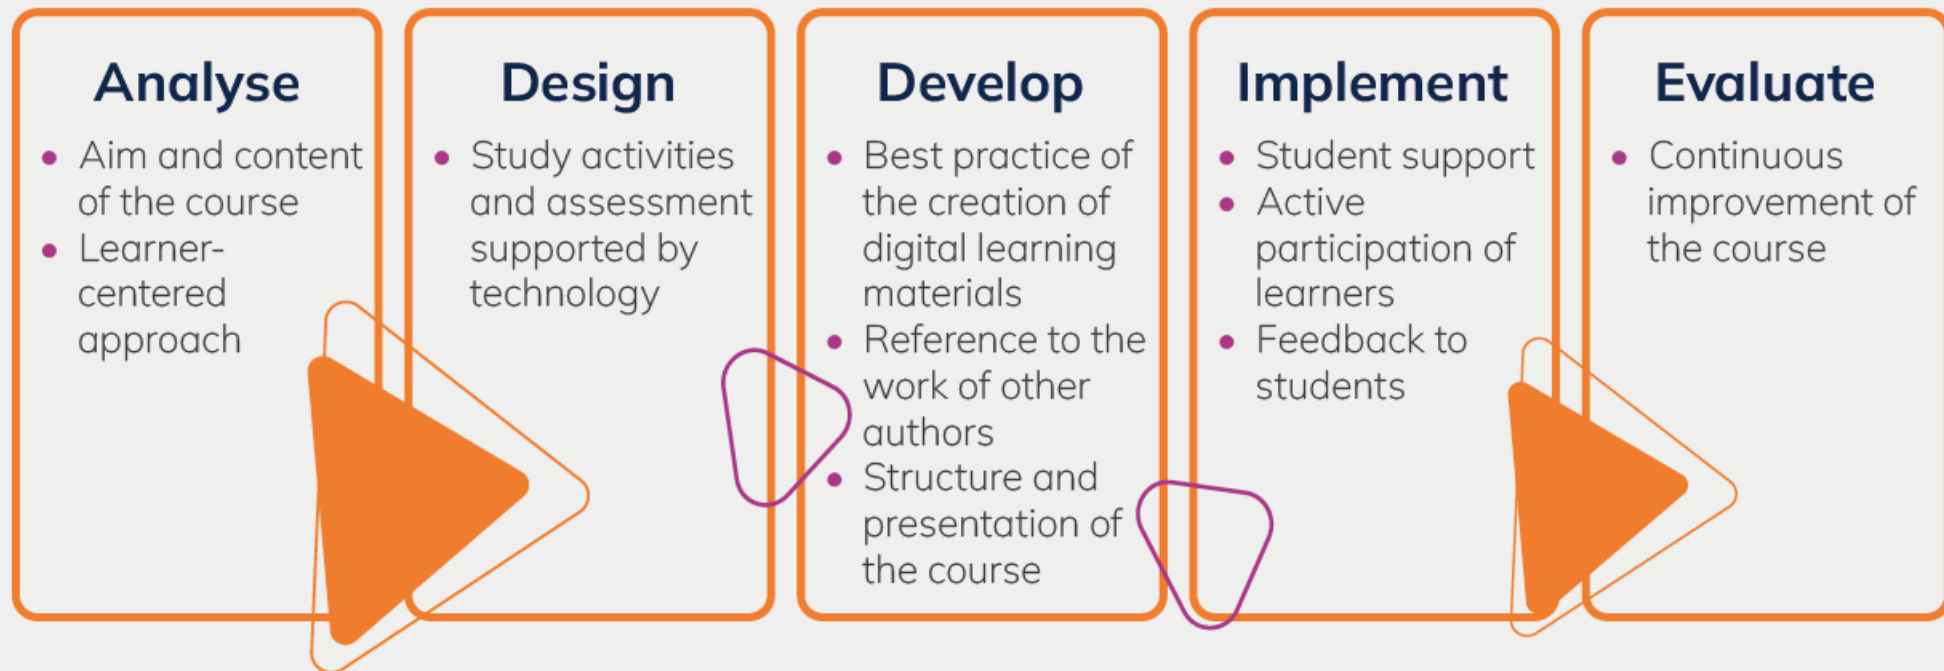

- Quality Labels awarded since 2008
- Agreement on "What constitutes a quality in digitally enhanced teaching and learning?"
- Guidelines "How to create a good quality blended or online course?"
- Working group is in charge
- Continuous update of criteria

E-course is a systematic comprehensive set of materials, learning activities and guidelines for learners that support the partial or full execution of the learning process online.

Building blocks of high-quality digital learning

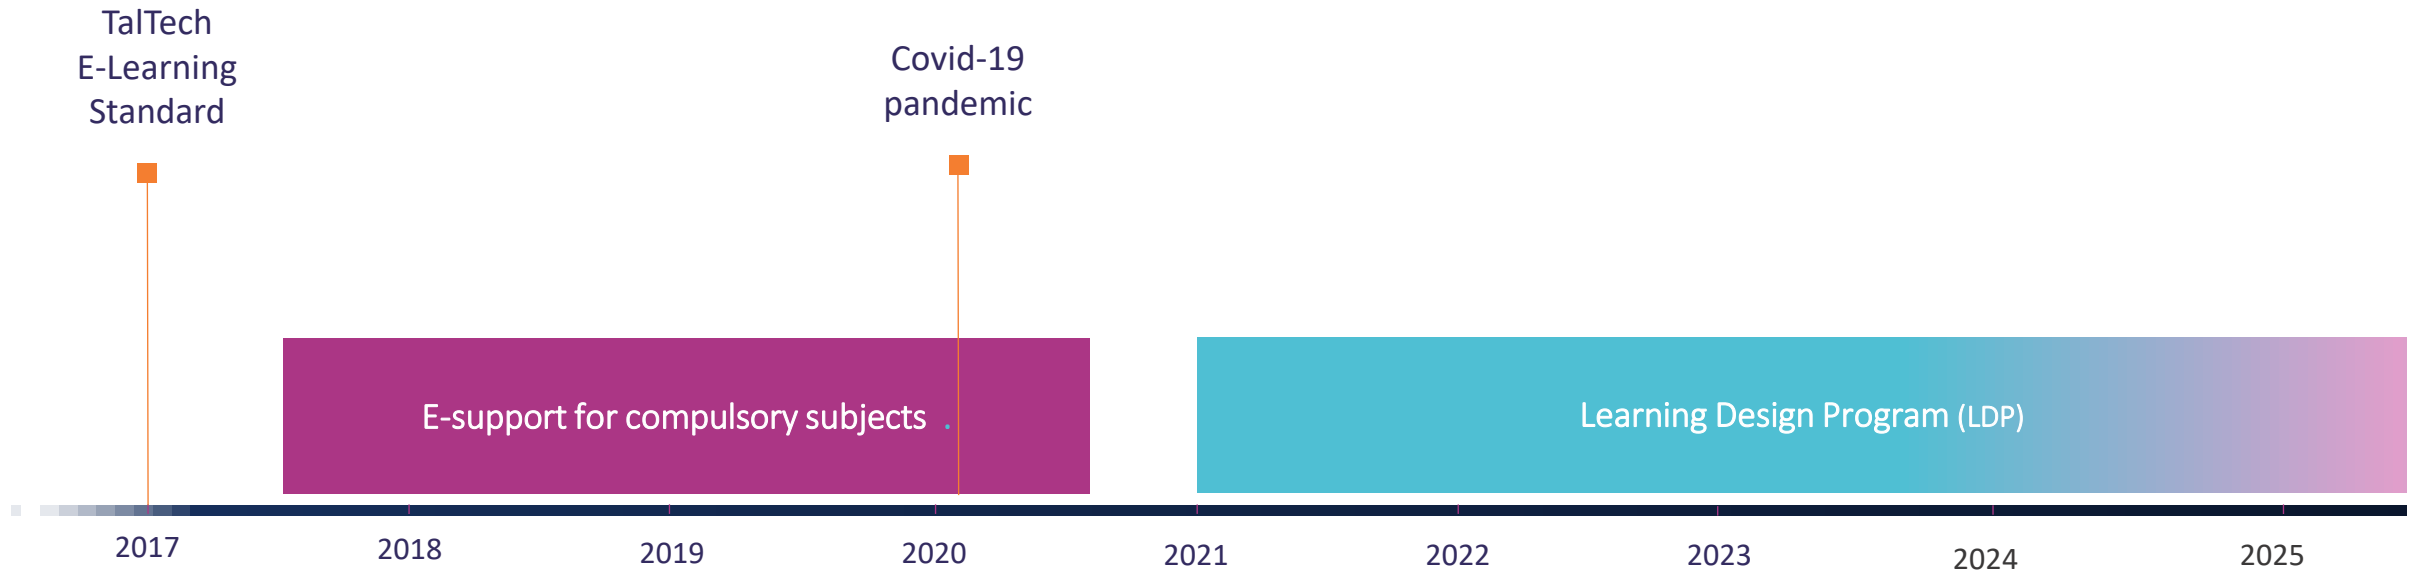

Quality criteria for digital learning and teaching are designed with global trends and best practices in mind.

TALTECH TIMELINE OF E-SUPPORTED LEARNING IN RECENT YEARS

LEARNING DESIGN PROGRAM IN NUMBERS

AIM:

- 200 advanced e-courses by 2025
- 25 courses in one semester

TEAM

- 5 instructional designers (each works with 5 courses)
- 2 multimedia specialists
- didactics expert

SOFAR:

- 8 semesters
- 176 courses
- 156 successfully finished the program
- increased number of national e-course quality labels received

LEARNING DESIGN PROGRAM PROCESS

WHY WE CREATED THE LD PROGRAM MOODLE COURSE?

- **Better overview** of the course progress
- How to determine **who has graduated** the program
- Give the participants a **great Moodle experience (as a student)**

SUCCESS FACTORS

Shared understanding and cooperation - **the Learning Community**

Good self-evaluation tool as well as the quality framework for internal quality assurance

CHALLENGES

Understanding of quality may differ from experts to teachers and students

Self-evaluation may be time and resource consuming...

Is there a different criteria needed for blended vs fully online courses?

Best courses come from the HEIs with good support system for teachers and learners. What about others (teachers and students)?

Source: pexels.com

- What do you consider as **the key quality criteria** for digital teaching and learning at the course level?
- How to support the quality in digitally enhanced teaching and learning **at the institutional level**?
- How to move **from the enthusiastic to the systematic approach** in managing the quality of digitally enhanced teaching and learning?

Source: pexels.com

Thank you!
